

**Freeway via Express Lane,  
1130', 5.11c/d**

2 sets wires, 2 sets tcu's to 2.5"cams, one 3".

These two pitches  
can be combined,  
with good rope  
management.

From the anchor, move out right  
into a beautiful handcrack, "The  
Daylight Crack"

The approach ramp is hidden by thick trees. Start  
from the base of the cliff at a small clearing. Scramble  
up and right through thick trees to a small open ledge  
at the start of the approach ramp. The bolted slab  
start is about 30 feet higher up the ramp.

The first pitch, a bolted slab  
to the left of the approach  
ramp, is a little out of  
character with the rest of  
the route. It is normally  
avoided by continuing up  
the approach ramp and  
pulling up a fixed rope to  
reach the tree that provides  
the first anchor
